- Private LTC/Community Care
- Home Care
- Primary care - Prince County
- Primary care - Queens County

Health PEI's antimicrobial guidelines are available on Firstline and through the microbiology page of the Staff Resource Centre. How do you access our health authority's antimicrobial guidelines?

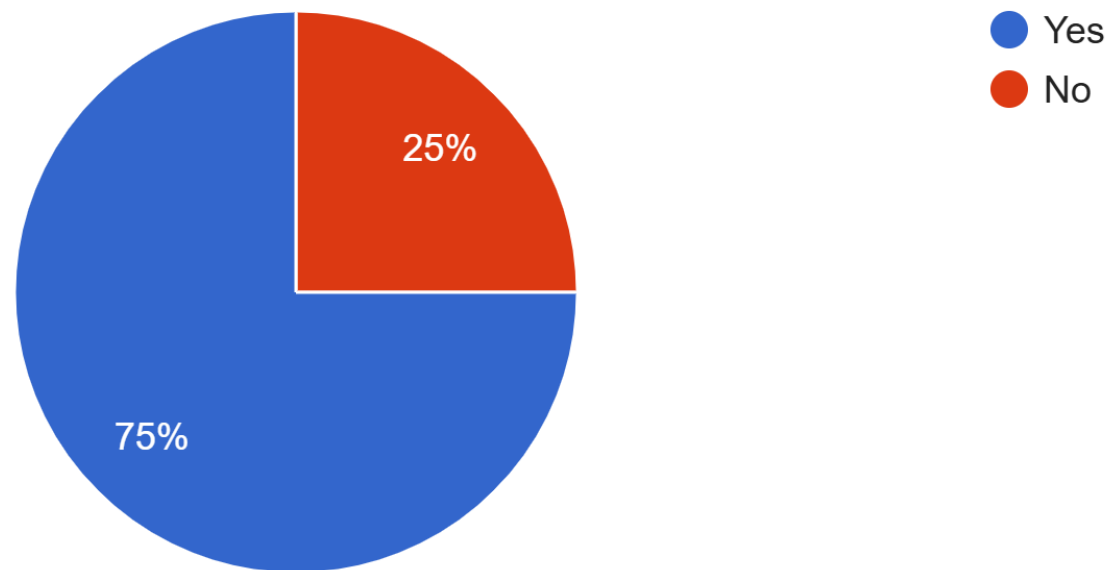

16 responses

- Mostly through Firstline
- Mostly through the microbiology page of the Staff Resource Centre
- I access the guidelines both ways about equally
- I don't access or use the Health PEI antimicrobial guidelines

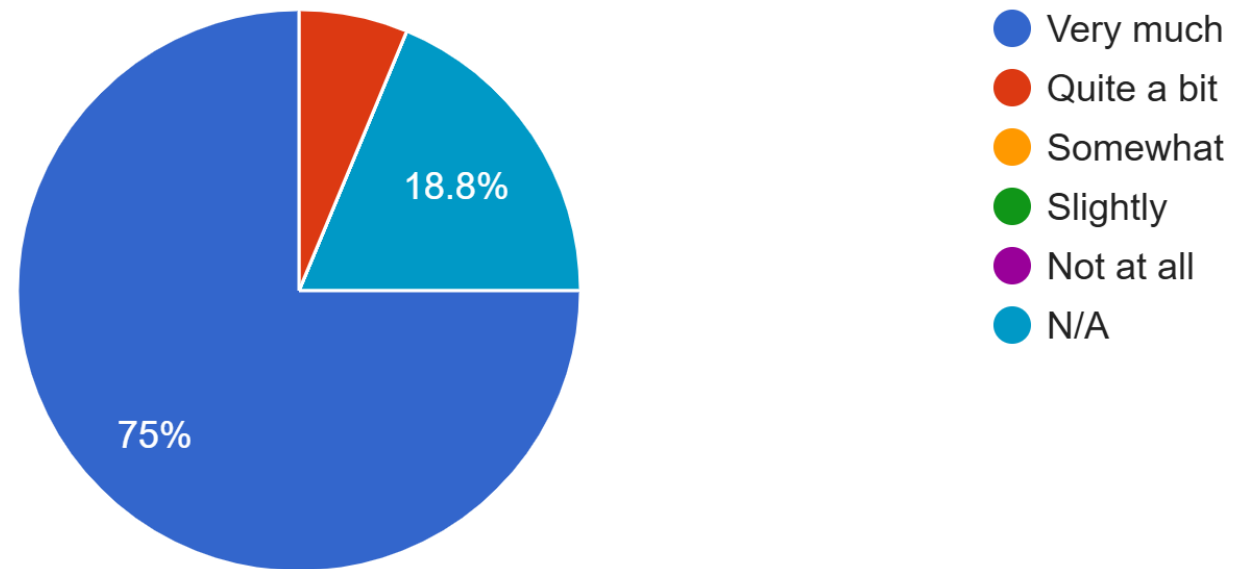

Are you aware that any new antimicrobial guidelines are incorporated into Health PEI order sets, such as those for pneumonia and COPD?

16 responses

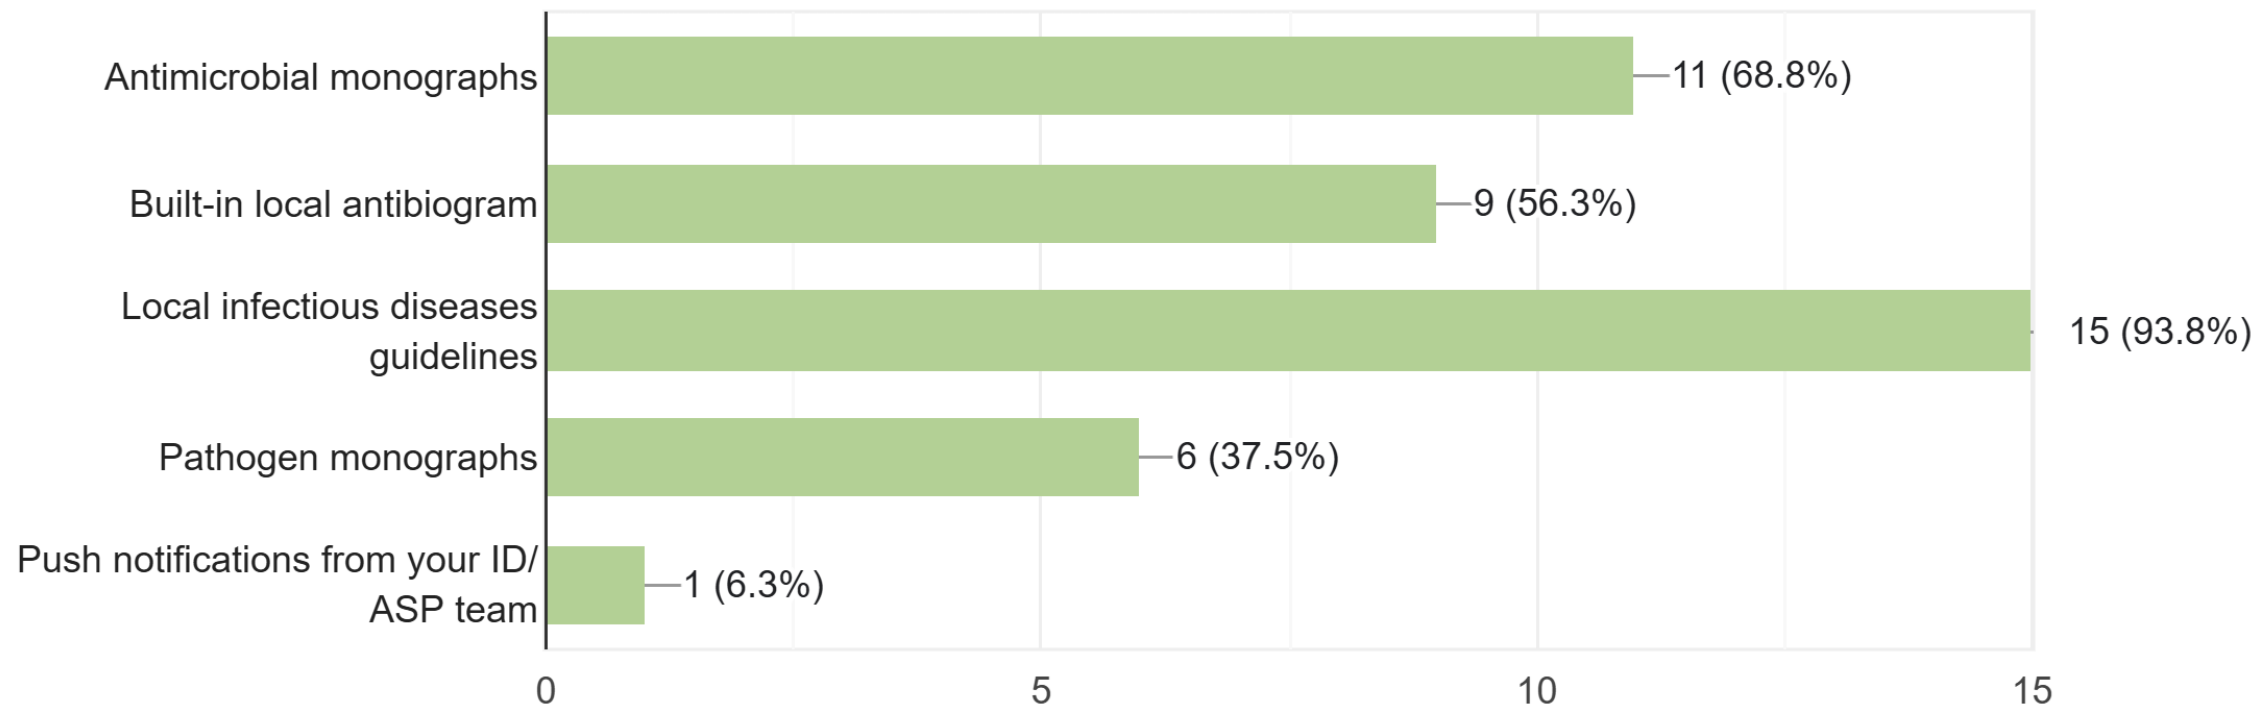

Has Firstline helped improve your prescribing/ verification decisions?

16 responses

Would you recommend Firstline to your colleagues?

16 responses

What other information would you like to have available on Firstline?

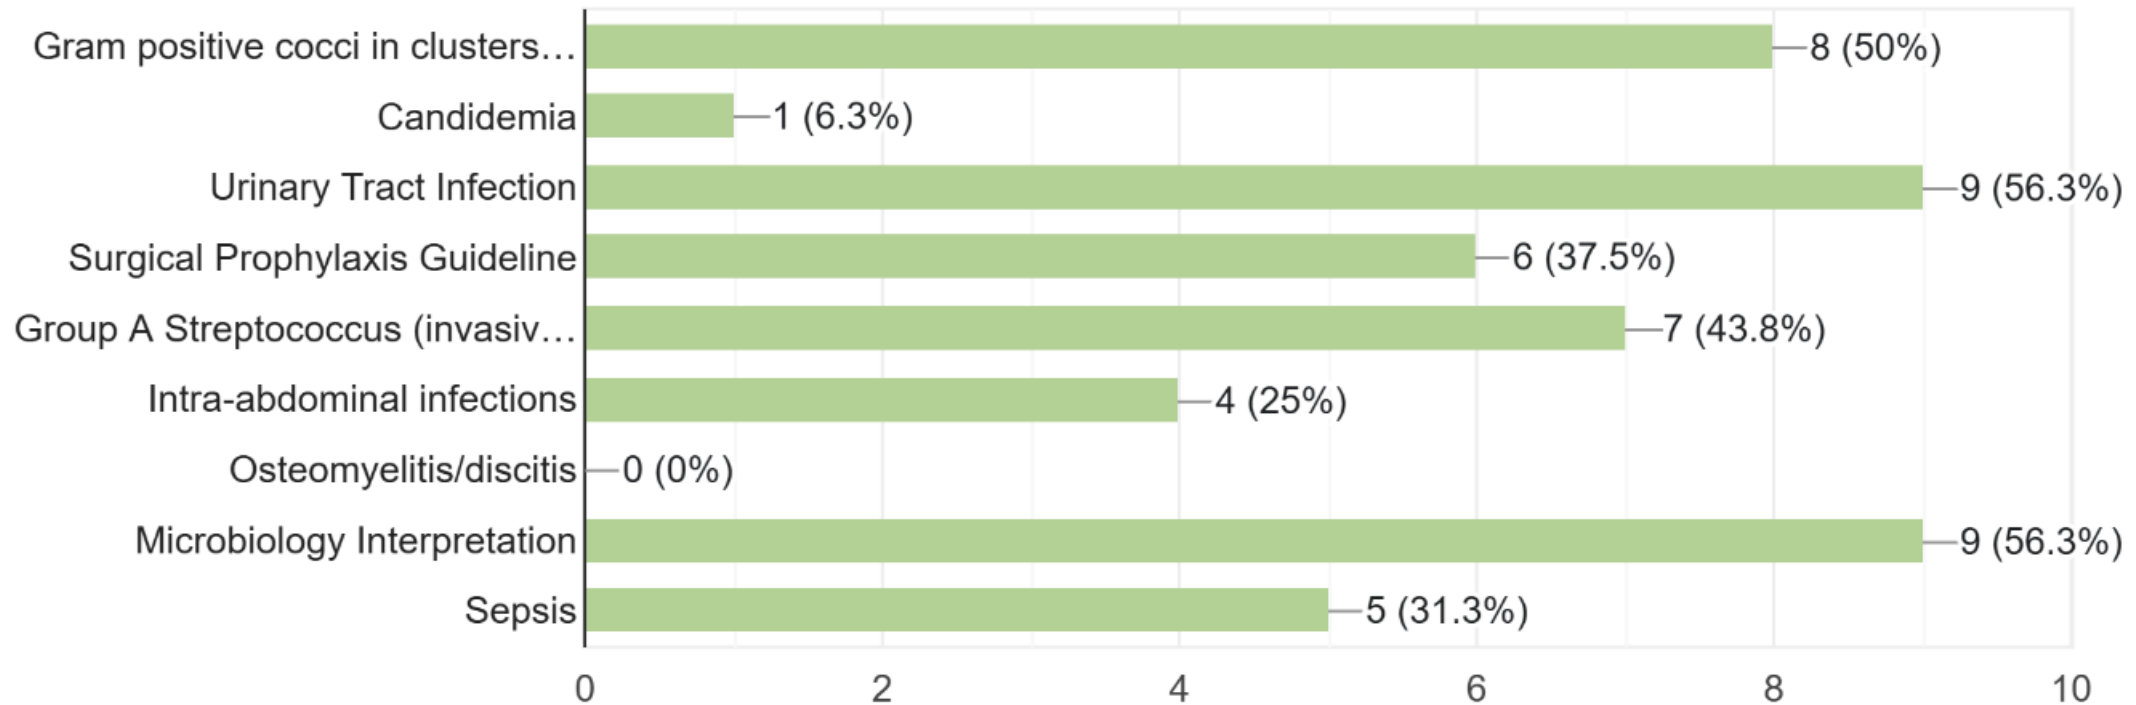

2 responses

Indications for dosing in the antimicrobial monograph. Recommended monitoring (cbc diff cr lfts etc) duration of monitoring for long term abx.

Pediatric dosing

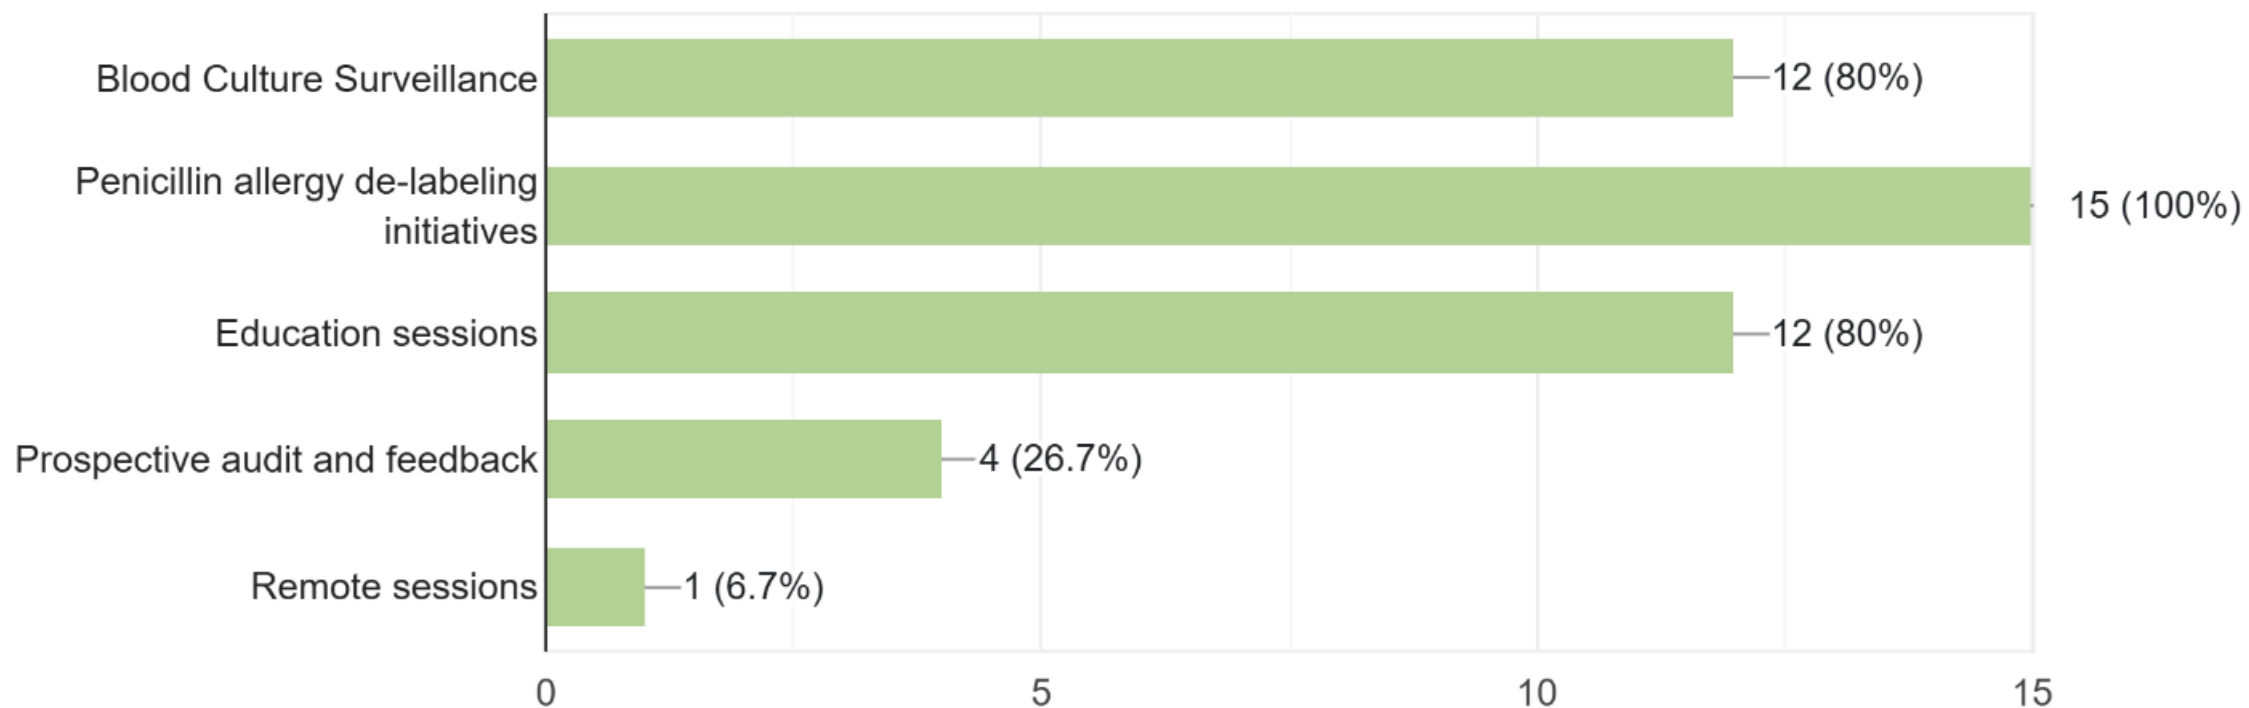

We are working to update our current Adult Antimicrobial guidelines and create new ones. Please choose three (3) of the following guidelines that you feel are a priority to update or create:

16 responses

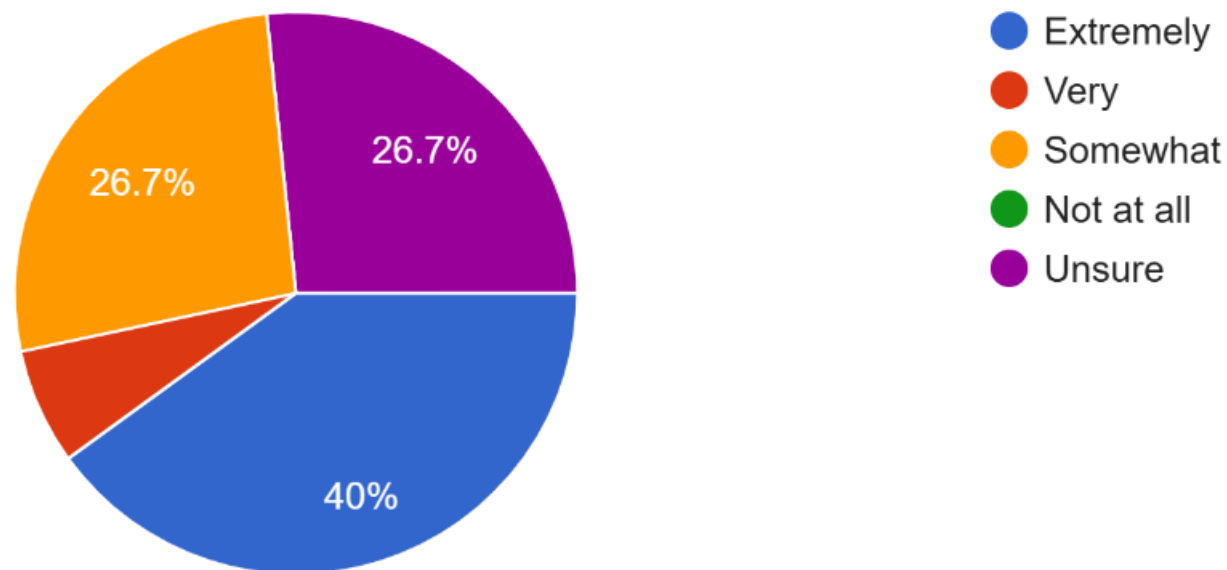

What Antimicrobial Stewardship Initiatives would you like to see at Health PEI? Select all that apply

15 responses

Do you find the requirement for a paper based special authorization process through PEI pharmacare to be a barrier to your patients having timely access to antimicrobial therapy?

15 responses

Please provide any suggestions for improvement with respect to Special Authorization criteria for antimicrobials

4 responses

Electronic application. Codes like in NS or ON

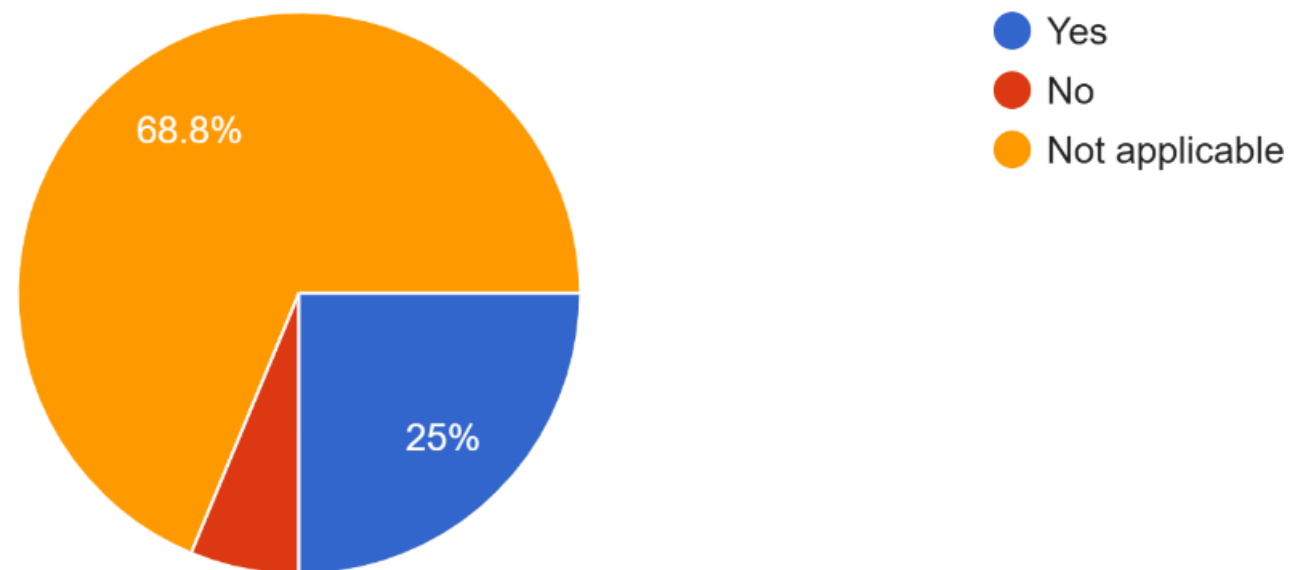

Any antibiotics started in hospital would be automatically covered.

Similarly to some oncology medications, if the prescribed antimicrobial is written by ID physician in PEI, then the SA process could be eliminated and the patient would only have to apply to the corresponding channel in Pharmacare (ex: high cost program; etc). The paper SA is not required for oncology meds on the formulary if ordered by a PEI oncologist.

Availability of indication codes community pharmacies can enter

If you are a prescriber, would you be interested in viewing your personal antimicrobial prescribing data and comparing it with the data of your peers?
